Extreme Bridge

Made to rest on top of any table, these compact plastic self-weighted cue holders will hold 2 cues. Simply place the holder on top of the table with the cue grooves hanging over the edge, and lean your cue back into the grooves. The cue grooves are deep enough to protect your cues against falling due to table bumping, while leaving them easy to grab when your turn is up. Plus, the compact size allows these holders to fit in the pocket of most cue cases, so you'll always have one when you need it.
