UNITED - AIRWAVE 2 Break Jump shaft Tip diameter: 13mm Ferrule: Black GE with WVP Tip: Samsara Length: 29.5inch Taper: Euro+ Joint type/diameter: 21.40 Ring: black Weight: approx. 115g **The AIRWAVE Break Jump stands for BEST performance.** With the Euro+ taper, NT ferrule, layer tip and balance, the latest generation AIRWAVE 24-7 offers all the advantages you are looking for! Extremely good handling in the break and jump shot Maximum power development in the break - with super control over the cue ball / the white ball Safe jumping over long and short distances thanks to optimized pressure development using an even better material mix Very good grip of the tip with all types of chalk The advantages of the United Carbon top technology are the experiences gained since the beginning of carbon tops in billiards from customers and us. The ongoing optimizations that result from this produce these top results. General advantages of a high quality carbon break top Special finish surfaces, pleasant feel, warp-free, balanced, insensitive to moisture, no reaction to climate fluctuations, easy to care for and extremely easy to clean, very high pressure stability.
