To celebrate 100 years of fine **Belgian craft**
number and the half circles around it acknowledging the use of the **Duramith™ Technology**. The cue ball is engraved with the Aramith logo on one side and with the number 100 on the other side.

With its deeper vitrification layer, particularly visible on the cue ball, this pool ball set looks like no others. The engravings are magnified, the colours are sublimated and their brilliance and glossiness are incomparable. Since this new resin has been developed and produced in our R&D laboratory for this specific set, the depth of the vitrification layer slightly varies from one ball to another giving a unique ivory shade to each ball.

Aramith100 is packaged in a **stylish box made of solid oak**. Inside the box, the lid is covered with a piece of the emblematic Yellow Green Simonis 860 cloth manufactured by Iwan Simonis in Belgium.

2X deeper vitrification layer
5X more resistant to impacts
3X more resistant to wear
3X more resistant to scratch and stain
