Cuetec Cynergy X, LAGOON NW, 3/8x14

Art.Nr.: P-LAgNW

1.395,00EUR / Stück

incl. 19% VAT plus Shipping

1 in stock

Multi-layer carbon fiber lower section Triplex carbon fiber and alloy matrix buttcap and collar Amber colored Clear-Tec® X epoxy resin finish Perforated ultra-thin poly grip Cuetec Acueweight Generation II weight system Duo Extension Ready Bumper Cynergy X thread protectors Cuetec upper section cleaning wipes High-performance Tiger® sniper tip CARBON FIBER RESIN MATRIX The Cynergy X's advanced resin matrix consists of 12 individual composite layers. Each of these layers is made from high-quality 15k carbon fiber strand originally developed for the aerospace industry. Embedded in a proprietary thermoset resin, the layers are carefully aligned and sequenced to ensure maximum stiffness and energy transfer without compromising feel. Ultra-high density X-FOAM FILLING The newly developed closed cell X-Foam is 20% denser than the foam used in Cynergy shafts. It helps to dampen the

acoustics of the cue and protects the carbon fiber body f unique impact feel of the Cynergy X. WEIGHT BIAS COMPENSATOR Behind the composite cap that holds the high density foam of the Cynergy X in place is the stainless steel weight bias compensator. This allows each individual Cynergy X cue to be balanced to an accuracy of 0.20 ounces during the multi-step manufacturing process. This ensures that minimal deviations in the weight of the foam or density do not affect the optimal balance point of the cue. CLEAR-TEC X EPOXY RESIN FINISH The newly formulated Clear-Tec X epoxy resin provides improved fiber adhesion and optimizes the acoustic properties associated with multi-layer carbon fiber composites. It also increases kinetic energy transfer and improves cue durability. ACUEWEIGHT GENERATION II SYSTEM The Acueweight Generation II system is designed to customize the weight of each cue to suit your playing style. With a specially designed butt cap design, it provides additional cavity and allows the use of spacers to move the cue's balance point without adding extra weight or requiring expensive tools. DUO EXTENSION READY Each Cynergy X cue is already equipped with a DUO EXTENSION compatible bumper, making it ready for future extensions using Cuetec products.
