Rasson Victory

The Victory III billiard table from Rasson sets new standards in design, precision, and stability. The striking V-shaped leg design not only gives the table a modern, architectural character but also ensures maximum stability. The Victory III is equipped with the patented Rasson SLS (Slate Leveling System) and LLS (Leg Leveling System), which ensure perfect leveling of the slate and the table structure. The combination of 30 mm thick premium Rasson slate,

aluminum support frame, solid zinc-aluminum corners, a dimensional stability. The high-quality aluminum aprons and the fluorocarbon coating give the table a particularly elegant and durable surface. The TPE (Thermo Plastic Elastomer) pockets are extremely quiet, dimensionally stable, and abrasion-resistant. The precision-engineered LevelBox II system allows for micrometer-precise fine adjustments of the slate throughout the table's lifespan. A professional Simonis cloth of your choice is included. All dimensions and properties comply with the standards of the German Billiards Union, making the Tournament Pro perfect for home, office, clubs, and pubs. 8 feet (ft) Playing area: 8 ft 224 cm × 112 cm External dimensions: 256 cm × 151 cm Border width: 17.5 cm Total weight: approx. 620 kg Space between floor and apron: approx. 60 cm Apron height: 18.5 cm Playing area height: approx. 78 cm Table height with boards: approx. 82–83 cm Table height to bottom edge of boards: approx. 61 cm Base dimensions: 131.5 × 92 cm Packaged in 5 boxes, total weight approx. 635 kg 9 feet (ft) Playing area: 9 ft 254 cm × 127 cm External dimensions: 291 cm × 164 cm Banquet width: 17.5 cm Total weight: approx. 680 kg Space between floor and apron: approx. 60 cm Apron height: 18.5 cm Playing surface height: approx. 78 cm Table height with banquets: approx. 82–83 cm Table height to bottom edge of banquet: approx. 61 cm Base dimensions: 131.5 × 92 cm Packaged in 5 boxes, total weight approx. 695 kg Further details on these models Three-piece slate The Rasson Victory III features a precision-ground 30 mm (1.18 in) thick, three-piece premium RASSON slate. This is ground and polished to a tolerance of less than 0.2 mm. The cushions are mounted with 30 screw connections instead of the usual 18, providing an exceptionally stable construction for precise ball reactions and maximum durability. Aluminum Support Frame An industrially manufactured aluminum alloy frame ensures perfect flatness and high rigidity of the foundation. This construction offers excellent stability while also being easy to assemble and transport. Even with fluctuations in temperature or humidity, the playing surface remains consistently level. RASSON MAX Rubber Cushions (K55) RASSON MAX rubber cushions are developed according to professional tournament standards and guarantee consistent, precise rebound with consistent hardness and elasticity. They are comparable in performance and durability to the best global brands. Hardness A: 43 ± 3 Rebound (according to DIN 53512): 75% ± 5% Rebound resilience (according to the AI method): 75% ± 5% TPE pockets with a precise design The newly developed pockets are made of high-quality TPE (Thermo Plastic Elastomer). They are quiet, dimensionally stable, and reduce abrasion and ball rebound. The material offers an ideal density for smooth ball landing and a long service life. Each pocket can hold approximately 12 balls. LevelBox II – Precision Leveling System The new LevelBox II system enables micrometer-precise fine adjustments at several key positions on the slate. This ensures the playing surface remains perfectly level even after years of use. Adjustment is easy via access points under the table, without the need for washers or spacers. Base Leveling System The patented Leg Leveling System (LLS) allows the table's legs to be precisely adjusted without having to lift the table. This ensures the table remains stable and perfectly aligned, even on uneven floors. Fluorocarbon Coating The high-quality fluorocarbon coating gives the Victory III a glossy, extremely durable surface, similar to that used in automotive construction. It is resistant to scratches, moisture, and temperature changes, ensuring a long-lasting, exclusive appearance. Delivery period: from 10 days Discounts for orders of 4 or more units upon request
